JOURNAL OF RESEARCH IN SCIENCE TEACHING

CONTENTS

Volume 25, 1988

Issue 1, January

- Learning about Technology: Family vs. Peer Pairings: *Patricia Heller, Michael Padilla, Barbara Hertel, and Roger Olstad* 1
- Learning Chemistry from Text: The Effect of Decision Making: *Jon Pedersen, Ronald J. Bonstetter, Alice J. Corkill, and John A.Glover* 15
- Predicting Genetics Achievement in Nonmajors College Biology: *Angela Mitchell and Anton E. Lawson* 23
- The Necessity of Each Phase of the Learning Cycle in Teaching High School Physics: *John W. Renner, Michael R. Abraham, and Howard H. Birnie* 39
- The Effect of Task Content upon Proportional Reasoning: *Walter L. Saunders and Joseph Jesunathadas* 59
- Ways Students Read Texts: *James H. Wandersee* 69

Comments and Criticism

- Comment on Interpretation of Statistical Analysis Regarding Sex Differences in Spatial Knowledge: *W. T. Griffith* 85
- Rejoinder to W. T. Griffith: *Susan L. Golbeck* 87
- Meta-Analysis: An Inappropriate Rationale for Science Education Research: *Brian D. Haig* 89

Issue 2, February

- Teachers' Conceptions of the Contemporary Goals of Science Education: *William J. McIntosh and Dana L. Zeidler* 93
- An Implementation Study: An Analysis of Elementary Students' and Teachers' Attitudes toward Science in Process-Approach Vs. Traditional Science Classes: *William C. Kyle, Jr., Ronald J. Bonnstetter, and Thomas Gadsden, Jr.* 103
- Descriptive Studies of Students' Conceptions in Science: *Maher Hashweh* ... 121
- Scientific Literacy and Informal Science Teaching: *Jan Maarschalk* 135

- A Research Strategy for the Dynamic Study of Students' Concepts and Problem Solving Strategies Using Science Software: *Joseph S. Krajcik, Patricia E. Simmons, and Vincent N. Lunetta* 147

Comments and Criticism

- Analysis of Student Errors in Science: *Ron Good* 157
- Authors' Response to Ron Good: *Kathleen M. Fisher and Joseph I. Lipson* ... 159
- Comments on Wandersee's Article "Can the History of Science Help Science Educators Anticipate Students' Misconceptions?": *Ehud Jungwirth* 161
- Author's Response to Ehud Jungwirth: *James H. Wandersee* 163

Issue 3, March

- Features Which Separate Least Effective from Most Effective Science Teachers *Robert E. Yager, Eddy M. Hidayat, and John E. Penick* 165
- Changes in Perceived Attitudes Toward the Goals for Science Instruction in Schools: *Robert E. Yager and John E. Penick* 179
- The Acquisition of Biological Knowledge During Childhood: Cognitive Conflict or Tabula Rasa? *Anton E. Lawson* 185
- The Relationship Between Cognitive Preferences, Student Background and Achievement in Science: *Pinchas Tamir* 201
- Improving Research on Teacher Quality in Science and Mathematics: Report of a Symposium of Scientists, Educators, and Researchers: *Rolf K. Blank* 217
- Student Perceptions on the Conditions of Learning the Proportion Concept in Canadian Upper Secondary Science (Physics, Chemistry, Biology) Classes; Results from the Second International Science Study (S.I.S.S.) in Canada *Joseph H. Menis* 225
- Evidence that Science Locus of Control Orientation Can Be Modified Through Instruction: *David L. Haury* 233

Issue 4, April

- Validation of Hierarchical Relationships Among Piagetian Cognitive Modes and Integrated Science Process Skills for Different Cognitive Reasoning Levels *Kueh Chin Yap and Russell H. Yeany* 247
- Instructional Objectives: What Effects Do They Have on Students' Attitudes Towards Integrated Science? *Adedayo O. Olarewaju* 283
- Physics in Canadian Secondary Schools: Intentions, Perceptions, and Achievement *Menahem Finegold and Dennis Raphael* 293

Issue 5, May

- On the Chemical Equilibrium Concept: Constrained Word Associations and Perception: *Esther Gussarsky and Malka Gorodetsky* 317
- The Nature and Use of Prediction Skills in A Biological Computer Simulation: *Derrick R. Lavoie and Ron Good* 333
- Understandings and Misconceptions of Biology Concepts Held by Students Attending Small High Schools and Students Attending Large High Schools: *William D. Simpson and Edmund A. Marek* 359
- Recall of the Pattern, Sequence, and Names of Concepts Presented in Instructional Diagrams: *Bill Winn* 373
- Relative Success in College Chemistry for Students Who Experienced a High-School Course in Chemistry and Those Who Had Not: *Robert E. Yager, Bill Snider, and Joseph Krajcik* 385
- Intergrating Quantitative and Qualitative Evaluation Methods to Compare Two Teacher Inservice Training Programs: *Frances Lawrenz and Heather McCreath* 395

Issue 6, September

- Successful and Unsuccessful Problem Solving in Classical Genetic Pedigrees: *Mike U. Smith* 411
- Elementary Science Textbooks: Their Contents, Text Characteristics, and Comprehensibility: *Linda A. Meyer, Lorraine Crummey, and Eunice A. Greer* 435
- Persuading Girls To Take Elective Physical Science Courses in High School: Who Are the Credible Communicators? *Thomas R. Koballa, Jr.* 465
- The Determinants of Female Junior High School Students' Intentions To Enroll in Elective Physical Science Courses in High School: Testing the Applicability of the Theory of Reasoned Action: *Thomas R. Koballa, Jr.* 479
- Computer Education in Secondary Schools in the People's Republic of China: *Chen Qi* 493
- Predicting Course Performance in Freshman and Sophomore Physics Courses: Women Are More Predictable than Men: *Susan McCammon, Jeannie Golden, and Karl L. Wuensch* 501

Issue 7, October

- Developments in Style and Purpose of Research on the Learning of Science: *Richard F. Gunstone, Richard T. White, and Peter J. Fensham* 513
- Expert and Novice Solutions of Genetic Pedigree Problems: *Mark W. Hackling and Jeanette A. Lawrence* 531
- Alternative Conceptions in Animal Classification: A Cross-Age Study: *John E. Trowbridge and Joel J. Mintzes* 547
- Jordanian and Malaysian Science Teachers' Prominent Perceived Professional Needs: A Comparison: *Kamariah Hj. Abu Bakar, Peter A. Rubba, Audrey N. Tomera, and Abdel Rahman Zurub* 573
- The Influences of Sequenced Instructional Strategy and Locus of Control on Preservice Elementary Teachers' Understanding of the Nature of Science: *Lawrence C. Scharmann* 589

Issue 8, November

- An Analysis of Four Ways of Assessing Student Beliefs About STS Topics: *Glen S. Aikenhead* 607
- State-Mandated Accountability as a Constraint on Teaching and Learning Science: *Terry Wood* 631
- Manipulation of M-Demand of Chemistry Problems and its Effect on Student Performance: A Neo-Piagetian Study: *Mansoor Niaz* 643
- Defining Attitude for Science Educators: *Robert L. Shrigley, Thomas R. Koballa, Jr., and Ronald D. Simpson* 659
- Attitudes Toward Science and Science Knowledge of Intellectually Gifted and Average Students in Third, Seventh, and Eleventh Grades: *Byron L. Barrington and Bryan Hendricks* 679
- Development of the Attitude Toward Science in School Assessment and its Use to Investigate the Relationship Between Science Achievement and Attitude Toward Science in School: *Paul J. Germann* 689

Issue 9, December

- Remediation of Student-Specific Misconceptions Relating to Three Science Concepts: *Alan K. Griffiths, Kevin Thomey, Bren Cooke, and Glen Normore* 709
- The Intellectual Factors Believed by Physicists to Be Most Important to Physics Students: *Arnold Peltzer* 721
- Formal Reasoning Ability and Misconceptions Concerning Genetics and Natural Selection: *Anton E. Lawson and Lois D. Thompson* 733

- Identification of Student Misconceptions in Genetics Problem Solving via Computer Program: *Mark E. Browning and James D. Lehman* 747
- The Influence of Cognitive Reasoning Level, Cognitive Restructuring Ability, Disembedding Ability, Working Memory Capacity, and Prior Knowledge on Students' Performance on Balancing Equations by Inspection: *John R. Staver and Tom Jacks* 763
- Induced Incorrect Generalizations Leading to Misconceptions—An Exploratory Investigation About the Laws of Reflection of Light: *J. K. Mohapatra* 777
